

Fernando Trisandi

Network Engineer | IT Operations | Infrastructure Support

- +62 812-2076-5119
- Bandung, Indonesia
- trisandifernando@gmail.com
- https://www.linkedin.com/in/fernandotrisandi
- https://github.com/Andosilaen

Key Technical Achievements

- **Infrastructure Stability:** Ensured High Availability (HA) for WAN/LAN infrastructure through rigorous preventive maintenance schedules.
- **Downtime Reduction:** Minimized system downtime by implementing automated logging and backup solutions via Bash scripting.
- **Tech Integration:** Integrated IoT-based LoRaWAN systems for industrial monitoring, significantly improving data accuracy.
- **Network Scalability:** Led the deployment and analytics configuration of industrial CCTV systems across multiple operational sites.

Strengths

Skills & Tools:

- **Networking:** WAN, LAN, VLAN, Mikrotik, DNS, DHCP, VPN, Firewall.
- **Server & OS:** Linux (Debian, Ubuntu, CentOS), Nginx, Apache.
- **Virtualization:** Docker, KVM/QEMU, VirtualBox.
- **Cloud:** AWS, Azure, Google Cloud
- **IoT & CCTV:** LoRaWAN, Gateways, CCTV Analytics.
- **Automation:** Bash, Cron, Backup & Log Automation.
- **Database:** MySQL, PostgreSQL, MSSQL.

Languages

- English (Business).
- Bahasa Indonesia (Native).

Education

- Bachelor's Degree in Information Systems.
- STMIK LPKIA | 2007 - 2011 | Bandung, West Java.

Additional Information

- Willing to work remotely or onsite.
- Experienced in working with international teams.
- Actively keeping up with the latest Technology and IT trends.

Curriculum Vitae

SUMMARY

IT Project Coordinator & Technical Lead with 8+ years of experience in network infrastructure, telecommunications, and system integration projects. Expertise in WAN/LAN/VLAN, IoT/LoRaWAN, CCTV analytics, and application lifecycle coordination, with strong Agile/Scrum execution and stakeholder management skills.

EXPERIENCE

Project Lead/Coordinator

✓ **PT. Dopay Aplikasi Indonesia** / *February 2024 – December 2024*

- Planned and coordinated technical project execution, including system architecture readiness, task allocation, and resource planning.
- Lead cross-functional technical teams (developers, designers, QA) to ensure application deployment and infrastructure integration met project requirements.
- Acted as a technical liaison between development teams, infrastructure/network engineers, and stakeholders.
- Identified and mitigated technical risks related to server readiness, network connectivity, deployment dependencies, and system stability.
- Managed task tracking and technical reporting using Jira, Trello, and Asana.
- Configured and validated server environments and network devices (routers, switches) to ensure secure and stable system access.
- Ensured alignment between application development, infrastructure setup, and production readiness during project delivery.

IT Coordinator and Support Specialist

✓ **PT. Nexwave Indonesia** / *June 2021 – December 2023*

- Served as an IT Coordinator and Support Specialist in the In-Building Coverage (IBC) Division, supporting enterprise and industrial projects.
- Acted as a liaison between field engineers, vendors, clients, and internal stakeholders to ensure smooth project execution.
- Managed and maintained WAN/LAN/VLAN network infrastructure, ensuring reliable connectivity and system availability.
- Configured and troubleshot routers, managed switches, access points, and LoRaWAN gateways/end nodes.
- Oversaw CCTV system installation, configuration, and analytics, including speed detection solutions
- Participated in IoT (LoRaWAN) deployments for PDAM Gianyar (Bali) and Yogyakarta, from site survey to system handover.
- Conducted site surveys, technical documentation, reporting, and client handover.

IT Support / Network Administrator

✓ **PT.Wiratama Prima Textile Indo** / *December 2018 – February 2021*

- Managed, maintained, and troubleshot WAN/LAN/VLAN network infrastructure in an industrial manufacturing environment.
- Configured and supported network devices including routers, managed switches, and wireless access points.
- Provided IT support for hardware and software, including system installation, configuration, updates, and repairs.
- Ensured stable and reliable operation of embroidery machine production software to support uninterrupted manufacturing processes.
- Installed, maintained, and troubleshot CCTV systems for office and industrial operational areas.
- Ensured system security through firewall configuration, antivirus updates, and data backup management

IT Support

✓ **PT.Tiga Putra Dharma Mandiri** / *January 2015 – January 2017*

- Managed and maintained office network infrastructure, including routers, managed switches, and wireless access points.
- Provided comprehensive IT support for both hardware and software, ensuring minimal downtime and an optimal user experience.
- Installed, configured, and updated software systems to maintain system integrity and improve operational efficiency.
- Diagnosed and repaired hardware issues involving desktop PCs, printers, routers, and peripheral devices.
- Collaborated with cross-functional teams to deliver timely technical support, system upgrades, and preventive maintenance.
